hygienetechnik

marob giant simple. fast. thorough.

clean and uniform.

our cleaning and maintenance system dries without streaking

simple.

The ergonomic and upright operation ensures effortless cleaning even over large areas.

the operation is therefore extremely simple:

1. attach the mop holder
2. fill the water tank
3. open the quantity dispenser

thorough.

Two-step wiping in one operation effectively removes sticky stains:

- ✓ The 1st mop is uniformly moistened by the appliance and removes adhesive dirt.
- ✓ The 2nd mop absorbs the dissolved dirt and excess moisture.

flexible.

The marob giant is at home wherever the cleaning and maintenance of large areas has to be done efficiently.

It masters routine cleaning as well as the proper care and sealing of all floors whether in gymnasiums, schools or administrative buildings, large open spaces or in narrow hallways.

105 cm

For the removal of adhesive dirt through a two step in one wiping system.

250 cm

For the effective removal of non-adhesive dirt.

80 cm

For the two-step wiping of narrow hallways.

Right Extender

For the uniform and efficient surfacing without stepping on wet surfaces.

fast.

The width of the mops of the marob giant are designed so that the surfaces are easily and efficiently maintained.

Non-adhesive dirt such as dust and sand are simply and effectively cleaned up with the micro-fiber mop with a cleaning width of 250 cm.

More persistent dirt and stains are removed effectively and easily with the 105 cm wide attachment using the 2 in 1 procedure. By using this simple and ergonomic operation, you can clean an area of up to 2,500 m²/hour.

athletic.

DIN 18032 II / EN 14904

Daily cleaning and maintenance with the marob giant guarantees compliance to the sport standards according to DIN 18032 II (friction coefficient and non-glare sports floor) through the effective removal of loose dirt and daily care with suitable maintenance cleaning agents.

DIN 77400

Clean sports flooring by daily cleaning with the marob giant system according to the DIN 77400 (daily removal of sticky and non-adhesive dirt).

Know-How

No matter if you have problems with slippery sports floors or general questions about the cleaning and care of your sports floor - **We are happy to help.**

gentle.

Little water use and simultaneous care with every cleaning. In this way floors receive a particularly gentle cleaning.

Cleans and simultaneously maintains

Using suitable polishing agents, the care substances are automatically applied to the floor by the two-step wiping with the marob giant. The maintenance agent dries uniformly after the 2nd mop and thus supplements the protecting layer without streaking.

Little water use on moisture sensitive floors

The water volume of the marob giant is adjustable so that a floor can be wiped wet or even only with a damp mist. Thus, even water-sensitive parquet floors can be cleaned very gently with a water consumption of 10 ml/m².

The finish

Polymer dispersions and emulsions can be uniformly and efficiently applied with the right-extended attachment marob giant.

high quality.

The use of high-quality materials (functional parts made of stainless steel, water tank made of fiberglass reinforced plastic) and highly developed technology ensure a long-lasting use without high costs.

The well-thought-out, mechanical design, which has been constantly improved on for over 20 years, ensures a maintenance-free system, that reliably makes the daily cleaning and care of large areas simple.

proven.

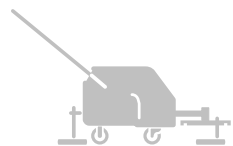

Behind the name of **marob Hygienetechnik** stands a family business in the 2nd generation. The marob giant is produced near Stuttgart in Baden-Wuerttemberg, which is the land of the tinkers and inventors, where our designs were invented and developed 20 years ago.

Because our tradition is perfectionism, we consistently follow our strict principles of quality in the **continuous development of our marob giant**.

Therefore our customers can rely every day on the proverbial Swabian quality of our marob giant and our decades-long experience.

Technical data

length/width/height	126 cm / 66 cm / 115 cm
working width	80 cm / 105 cm / 250 cm
weight	18 kg
water use	10-15 ml/m ² respectively 10-15 l per 1.000 m ²
water-tank capacity	35 l
coverage	2.300-3.500 m ²
castors	non-marking grey, smooth because of ball bearings
Factual area covered	
- dry cleaning 250 cm	ca. 7.000 m ² /h
- two-step wiping 105 cm	ca. 2.500 m ² /h
- two-step wiping 80 cm	ca. 1.000-1.500 m ² /h

ecological.

The marob giant protects the environment in a sustainable way: it does not consume electricity, does not produce wastewater and significantly reduces water and chemical use.

- ✓ No power consumption due to a purely mechanical operating mode.
- ✓ No waste water, since the dirt is absorbed into the special mops. The detergents used do not end up in the hydrological cycle.
- ✓ Little water and chemical use, a water use of 10-15 ml/m² and thus at least a 50% savings on water and chemicals compared to conventional cleaning systems.

Advantages at a glance

simple.

easy operation, ergonomic working, clean results - get going and clean metre by metre

fast.

large working widths ensure high area efficiency - with the marob giant you work quickly and effectively

thorough.

thorough cleaning with a 2 in 1 wiping operation

flexible.

flexible use on a wide range of objects, on different types of floors and varied cleaning steps

athletic.

safe and clean sports floors due to cleaning and care with the marob giant

gentle.

gentle cleaning with simultaneous care, little water and no mechanical stress on the floors

ecological.

it does not consume any electricity, produces no wastewater and it significantly reduces water and chemical costs

high quality.

a sophisticated technology combined with the highest quality materials leads to a long-lasting quality - made in Germany of course

proven.

recommended by customers and independent experts and our company has a 20 year track record in daily operations
